

Sanitary bag dispenser

Flushing sanitary products leads to sewer blockages, causing considerable environmental damage to rivers and waterways.

Help the environment in three easy steps

Step 1

Hygienically transfer your sanitary waste into a bag from one of our dispensers provided

Step 2

Place the bag and waste into the phs sanitary bin provided

Step 3

Sanitary waste collected from this premises by **phs** will be turned into renewable energy for the national grid

Sustainable Waste Management

If disposed of via landfill, sanitary waste can take over 500 years to decompose.

The LifeCycle strategy from diverts waste from landfill to Energy Recovery Facilities (ERFs). it is then turned into low carbon electricity for industries, schools , and perhaps even this building!
